And many more

Welcome to the first Production Works information bulletin for 2007. In addition to the vast range of services and products and support that we've been offering you for many years, we have some exciting new gear to tell you about.

· Even wider range of professional microphones now available

Production Works has recently negotiated access to some of the world's most reputable brands of professional microphones. Our extensive microphone stock now includes Shure, AKG, TOA, ElectroVoice, Nuemann, Beyer, Sennheisser and Behringer, with prices starting from only \$50.

· CircuitTube - instant lighting bars and cabling

CircuitTube is a brilliant, but simple concept that combines the functions of a full-strength lighting bar and a cable duct to produce a stylish lighting bar with built in power and control sockets. Ideal for drama rooms and performing arts centres, CircuitTube is gaining wide acceptance for school installations throughout the state. Ask us about our package deals on lighting bars and patch panels for drama rooms.

· Behringer - more budget audio solutions

Production Works now carries a substantial range of Behringer products in stock. Drop into our showroom to see and hear Behringer speakers, amplifiers, microphones, signal processors, headphones, a wide selection of mixers and the full range of foot pedals.

· Dimmers for every situation

Production Works can now offer a range of dimmers suitable for every size of drama facility. In addition to the well-known LSC dimmers, suitable for applications ranging from a small performance studio to the Theatre Royal, we now stock the innovative Theatrelight dimmers from New Zealand. Of particular interest is the Comet range of small, single-phase dimmer racks. Not only do the Comets run off a standard general purpose power outlet (GPO), they also connect to any standard DMX lighting console.

· Yamaha range now available

Production Works are proud to have been selected as dealer for the renowned Yamaha products, ranging from electronic keyboards and musical instruments to mixers, amplifiers, signal processors and loudspeakers.

· Consumables - what do you need?

No matter what consumable materials you need for your classes or productions, you will probably find it at Production Works. From gaffer tape to fog fluid, specialist fuses to microphone leads, colour filter to exotic lamps, and gobos to leads, give us a call for a competitive price, prompt service and unparalleled technical advice.

· Pro-Stage - flexible and safe staging

Production Works can now offer, for hire or sale, the Pro-Stage system of stage modules. This highly flexible staging system is available in a variety of adjustable-height stage units, steps, handrail modules and dollies, and is fully compliant with the Building Code of Australia's requirement for permanent stages. Should your basic drama set-up need extending for a major production or school function, Production Works can rent you the additional modules and accessories.
